

Knowledge Organiser: It's a Bugs Life

What is an insect?

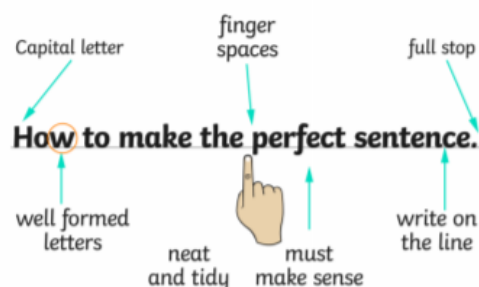

Insects are small animals with six legs. Most have wings and antennae. Insect bodies have 3 parts—head, thorax and abdomen. Some have a hard outer shell called an exoskeleton.

What should I already know?

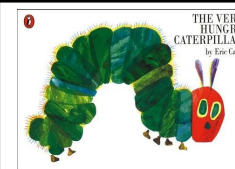

Insects are small creatures that are many different species.

Insects can be found in different places

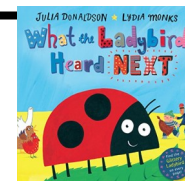

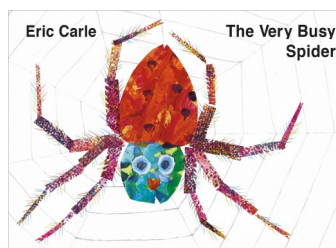

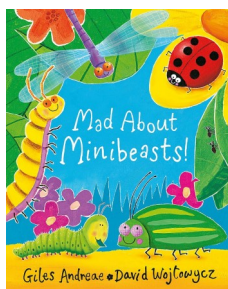

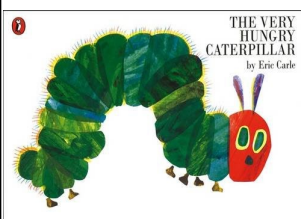

Sentence Structure

The Very Hungry Caterpillar

We will learn about the life cycle of a butterfly using the familiar story of the Hungry Caterpillar. We will receive our own resident Caterpillars and watch them grown and change!

Key Texts

What the Ladybird Heard Next

We will use this story to create story maps and follow the exploits of this clever little ladybird!

Bees

We will learn more about how important insects are good for our ecosystems. We will also be tasting some honey.

The Very Busy Spider

This spider is so busy spinning a web he is not aware of the animals on the farm talking to him! Spiders can be scary but very interesting creatures.
