

Knowledge Organiser: A Whole New World

Key Vocabulary:

Key Vocabulary	Definition
civilisation	An organised society with its own culture and way of life, existing in a particular area over a particular period of time.
drought	A long period with very little rain.
ritual	A ceremony, often religious, with set actions performed in a set order.
jaguar	A big cat, heavier than a leopard, with yellowish fur and black spots.
scribes	People paid to write things down, either as an official record or for someone else unable to write.
codices	Ancient handwritten texts. Maya codices could be unfolded like a concertina. One text is called a codex.
maize	Another word for sweetcorn or corn on the cob. It can be made into a dough and baked into tortillas.
cacao beans	Cacao trees sprout pods directly from their trunks. When they are ripe, the pods can be broken open to reveal the beans, which can then be dried, roasted and ground.

Key Events

2000 BC	The Maya civilisation comes into being in Central America.
300 BC	Cities, such as El Mirador, become large and powerful.
AD 900	Cities in the rainforest are abandoned due to an extensive drought . People move north to the highlands of Guatemala and the Yucatán.
AD 1000	Cities like Chichén Itzá (which has two temple pyramids) are still thriving.
AD 1500s	The Spanish arrive in South America and set out to destroy the remaining elements of Maya civilisation as part of their conquest.
AD 1839	American explorer and writer, John Lloyd Stephens, and British artist, Frederick Catherwood explore Copán and extensively document what they find, reigniting interest in the Maya civilisation . They go on to document other Maya cities, including Chichén Itzá.
AD 2014	The cities of Lagunita and Tamchén are rediscovered.

Earthquakes

- Earthquakes are caused when the earth's **tectonic plates** suddenly move.
- Most earthquakes occur near the **tectonic plate** boundaries.
- Earthquakes can cause lots of damage to roads, buildings and property.

Volcanoes

- Volcanoes are made when pressure builds up inside the earth. This affects the earth's crust causing **magma** to sometimes **erupt** through it.
- Active volcanoes have **erupted** in the last 10 000 years.
- Dormant volcanoes haven't **erupted** in the last 10 000 years but may erupt again.
- Extinct volcanoes aren't expected to **erupt** again.
